

Cooperation Project „Cadastral Maps” Meeting

Poznań 06.06.2011, 14.00 – 15.30

Based on the uniform cadastral survey in the Habsburg Monarchy in the 18th – 19th centuries great amounts of documents including cadastral maps have been created. Those documents are preserved in archives and institutions of 12 European countries: Austria, Croatia, Czech Republic, Hungary, Italy, Montenegro, Poland, Romania, Serbia, Slovak Republic, Slovenia, and Ukraine.

The uniform character of cadastral documents provides an ideal base for international archival cooperation projects aiming at mass digitization and GIS-based internet-publication of these maps and connected records, also responding to the increasing international interest regarding historical maps and connection of archival data to topographical coordinates using GIS systems. The aim of founding a “Cadastral Maps Network” of the interested members of ICARUS is to build up a framework which can promote effective future cooperation in this field. All ICARUS-members are invited.

Agenda

1. Welcome
2. Introduction
 - 2.1 Cadastral documents as potential objects for international cooperation
 - 2.2 Summary of the results of the Conference „Cadastral Maps in Central Europe”
 - 2.3 Creation of „Cadastral Maps Network” – aims and possibilities
 - 2.4 Proposal for the activities of Cadastral Maps Network in 2011/2012
 - 2.5 Organizational and administrative background
3. Discussion
4. Conclusion

Concept: Budapest Főváros Levéltára
