Date: November 25-27, 2013

ICARUS-Meeting #12

Work group: Didactics/Monasterium

Agenda

MOM-Ca Tools – The current status quo

The Didactics group, in collaboration with Monasterium — Technical Development, is glad to be able to organise a "sneak peek" workshop within this ICARUS-Meeting #12. During this hands-on workshop, the developers from Cologne will first briefly introduce their work and present the current state of the tools. Afterwards, there is going to be time for selected members of the Didactics group to try out the new tools and for the developers to get to know their end users' needs in the context of teaching.

The workshop is open to all participants of the ICARUS-Meeting, too.

- Georg Vogeler (University of Graz): Introduction

- Jochen Graf (University of Cologne): How to make a Digital Cartulary with MOM-CA

- André Streicher (University of Cologne): The Image Tools in Monasterium. How to create annotations and image collections

- Antonella Ambrosio: Conclusion
