

*The map collection
from the
Mayer family archive*

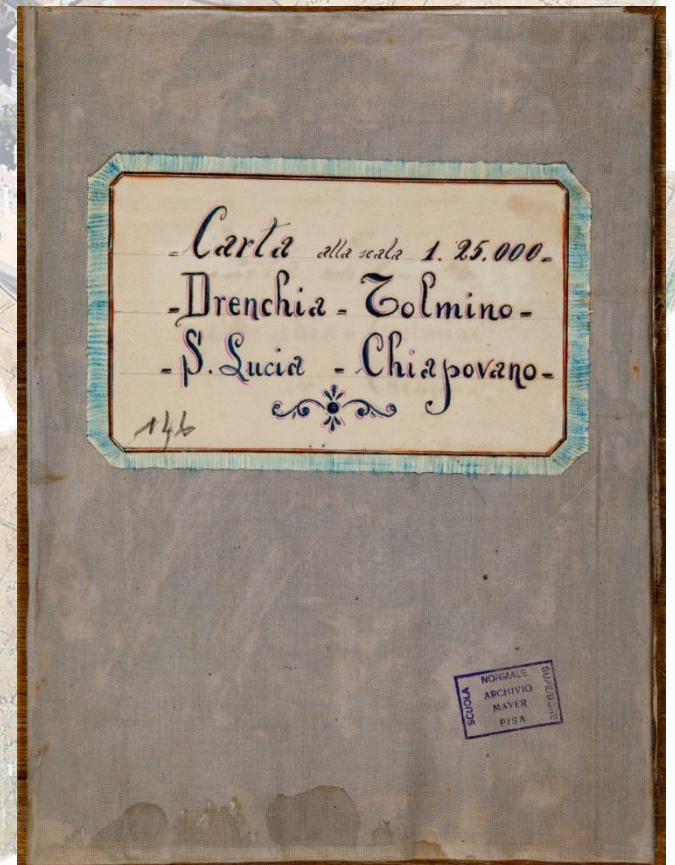

The Mayer family was part of the wealthy aristocracy of Livorno.

Several of the Mayer's were engaged in cultural, patriotic and social activities.

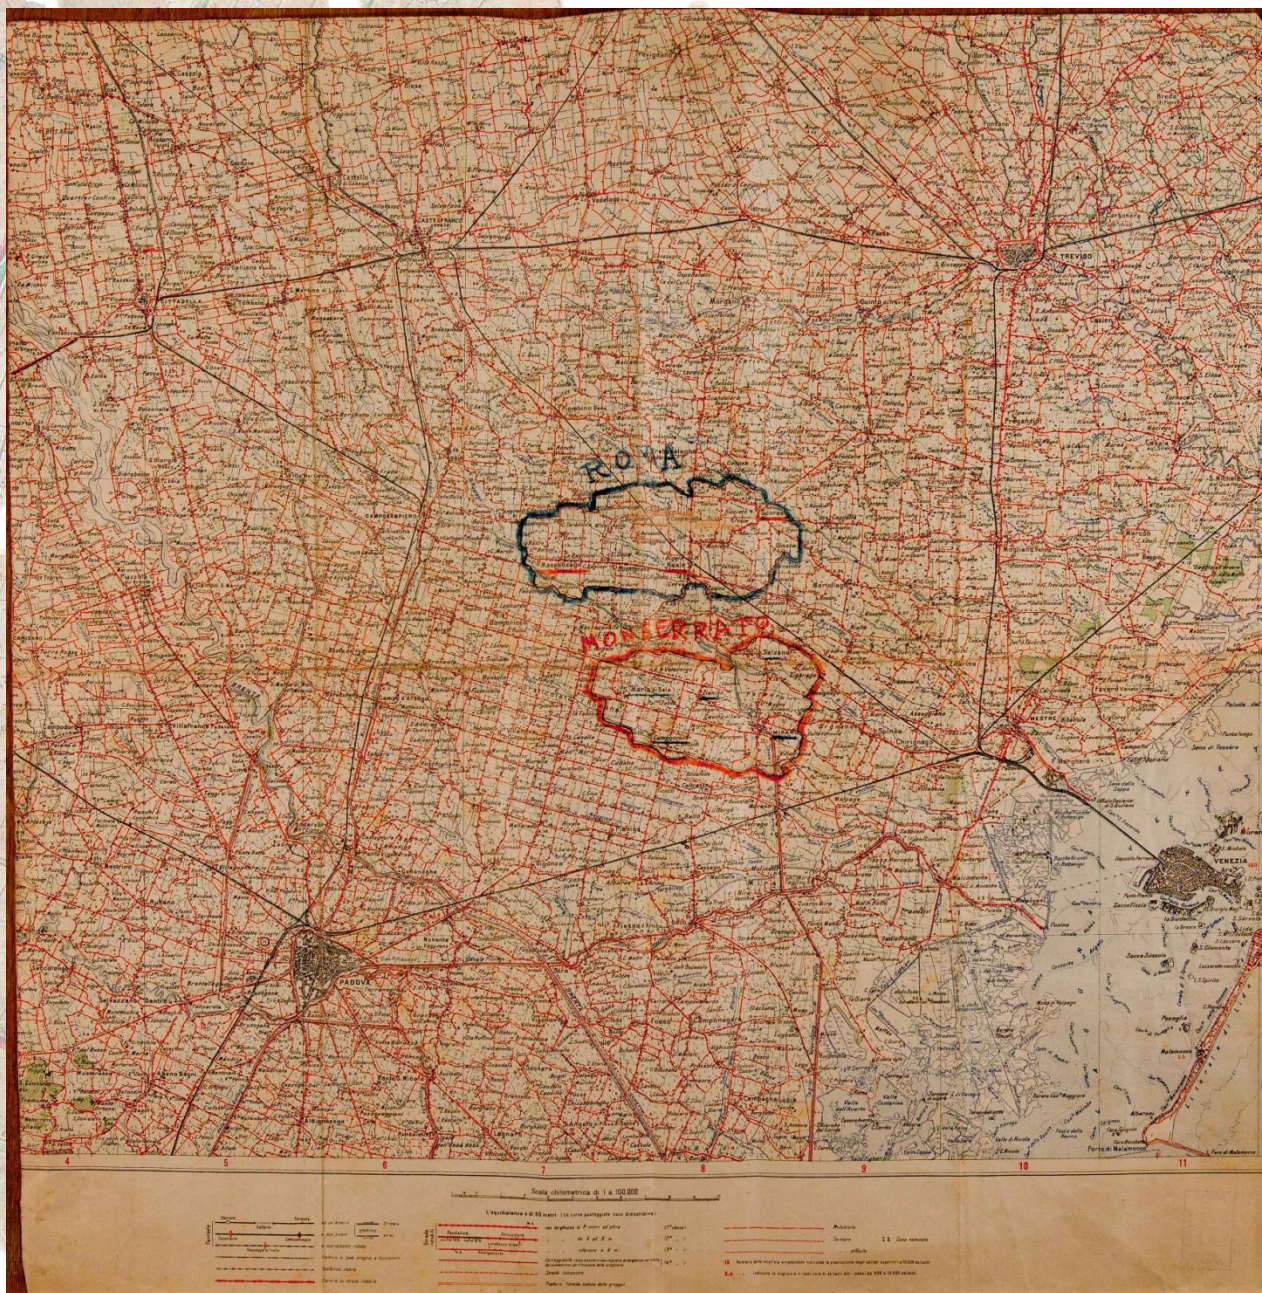

Francesco Mayer took part to WWI as young officer.

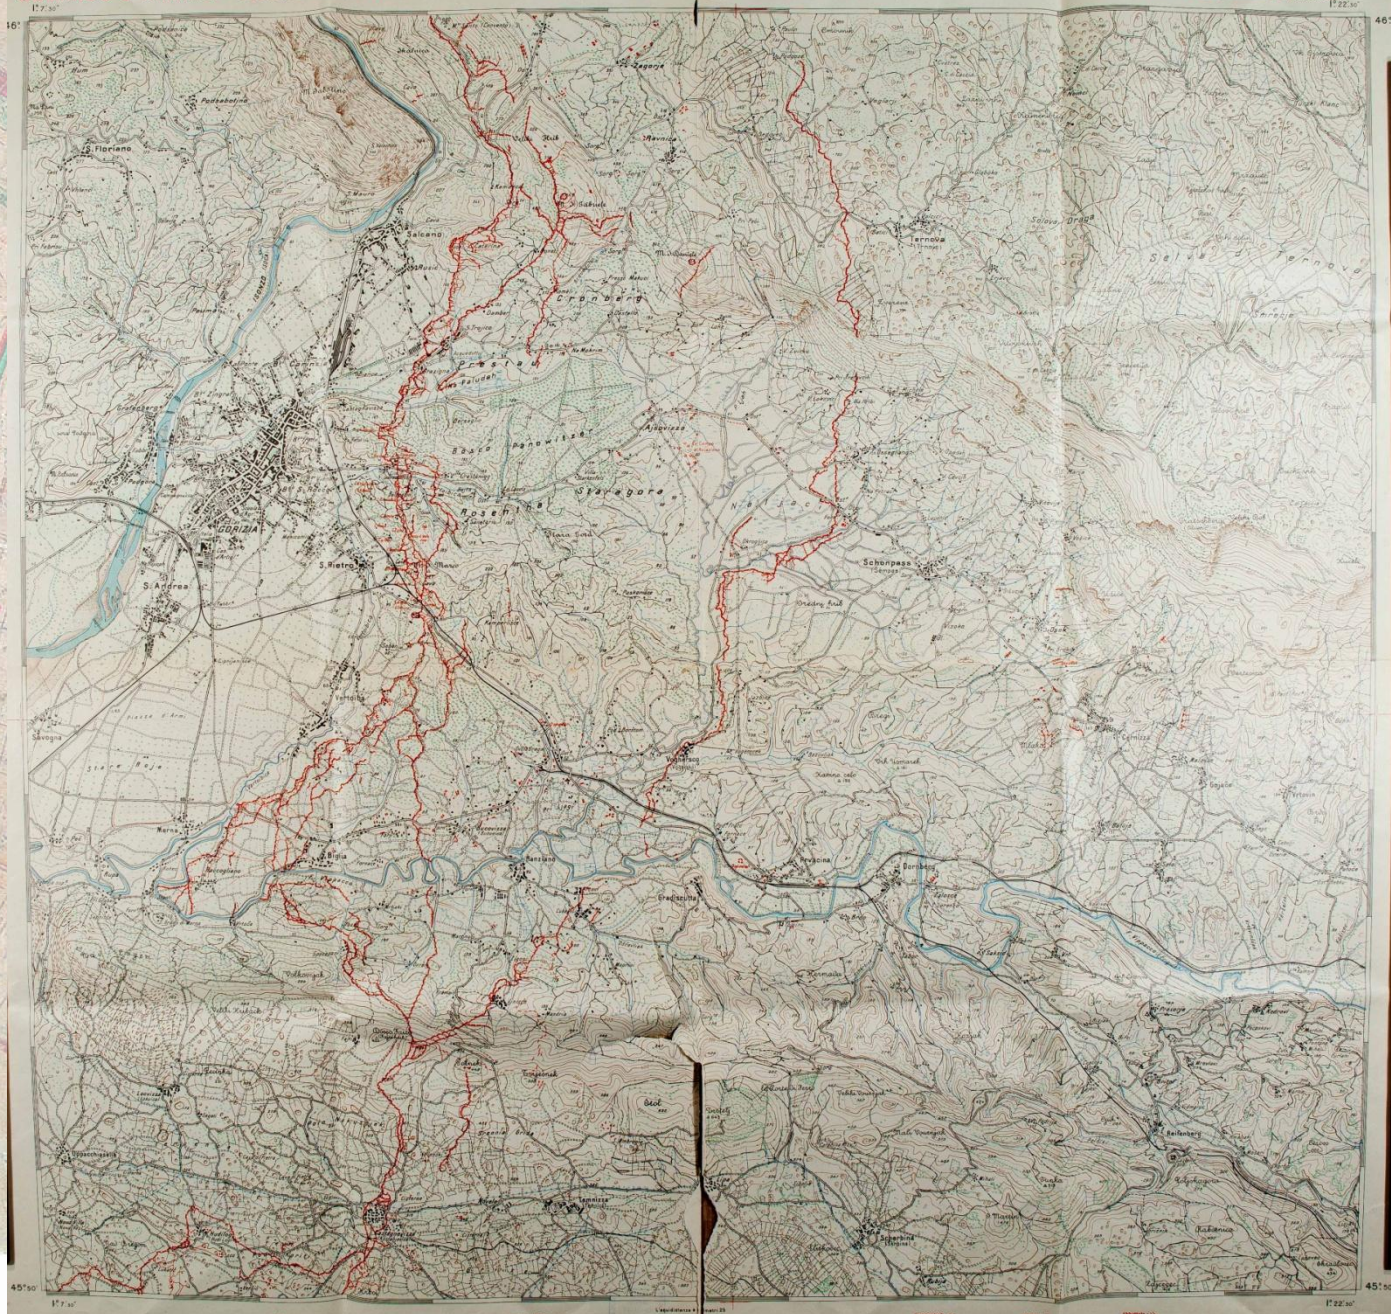

The most impressive group of maps from his large cartographic collection, goes back to 1914- 18.

Due to the destruction of military archives in Italy, some of them can be considered very rare documents.
