

UNLEASH THE INVISIBLE -THE POWER OF SPECTRAL IMAGING-

Workshop, Vienna 15th June 2018

*See the invisible? Access the hidden information?
This is what Xpectraltek does.*

It provides you with affordable imaging solutions and allows you to see beyond what your eyes can. Find out more about our state-of-the-art spectral imaging technology and see for yourself the transformation this can bring to your daily work!

ICARUS, the Academy of Fine Arts Vienna, Institute for Conservation – Restoration and XpectralTEK (Portugal) organise a workshop focused on the current spectral imaging technology used in remedial and preventive art conservation. The basic principles of spectral imaging will be explained and the available technological solutions presented. Current use of this technology in the field of cultural heritage will be demonstrated and future applications discussed.

The workshop will be held in English and is targeted to professionals in museums, archives, libraries as well as in the field of conservation-restoration.
