

UNLEASH THE INVISIBLE -THE POWER OF SPECTRAL IMAGING-

Workshop, St. Pölten 15th June 2018

What if you could see more? See the invisible? Access to hidden information? Learn more through this extra information? This is what Xpectraltek does.

Provides you with affordable imaging solutions that allow you to see beyond what your eyes can, and learn from it.

Find out more about our state-of-the-art spectral imaging technology and see for yourself the transformation it can do to your daily work!

ICARUS and XpectralTEK (Portugal) organize a workshop focused on the current Spectral Imaging technology used in active and preventive art conservation. The basic principles of spectral imaging will be explained, and the available technological solutions exposed. Potential applications on cultural heritage will be presented from real case studies, and the future perspectives will be discussed.

The workshop will be held in English and is targeted to professionals in the field of museums, archives, libraries and conservation of cultural heritage in general.

AGENDA

- 14:30 Welcome
- 14:40 **Introduction:**
Spectral Imaging in Art Conservation
XPECAM Platform: Current Technology
- 15:30 Coffee break
- 16:00 Hands-on session (XpeCAM equipment)
- 17:15 **Powerful tools:**
Advanced Post Processing and Analysis
XpeCAM X02 Project: The Future
- 17:30 Discussion session: Technology sum-up and questions
- 18:00 End of Spectral Imaging Workshop

Venue: Diözesanarchiv St. Pölten, Klostergasse 10, 3100 St. Pölten
Registration: Until 9th June 2018 www.icar-us.eu (max. 15 participants)
Participation: Free of charge

XpectralTEK is a company with a focus on imaging diagnostics, creating tools to assist professionals in their daily work. We offer quality proven solutions, with specialization in spectral imaging.

Co-funded by the Horizon 2020 programme of the European Union
